

Participant Certificate

WMS Database

The Fraunhofer Institute for Material Flow and Logistics confirms that

viastore systems GmbH

is a participant in the WMS database for the research period 2010/2011 with the software
system

SAP Logistics Execution SAP ERP 6.0

The database is carried out by Fraunhofer IML in collaboration with IPL Consultants b.v. and involves the recording of more than 3.000 individual aspects (concerning the functionality of the software and the services provided by the company). Approximately 1.700 individual aspects of the system have been verified by Fraunhofer IML employees in collaboration with viastore systems GmbH.

The verified data on all participating companies is entered in the warehouse logistics database on warehouse-logistics.com. The database therefore offers a simple, objective and efficient method for the pre-selection of Warehouse Management Systems. The validation seal is only awarded after the complete validation and affirms the quality and correctness of the WMS functionalities.

The additional certification DIN EN ISO 9001 of TÜV NORD CERT GmbH, which the validation process of warehouse logistics received, guarantees high quality and objectivity in the sectors of administration, development and sales of services in software validation.

Dortmund, 14th October 2010

Prof. Dr. Michael ten Hompel
Managing Director of the Institute
